

Reflection: AI-Driven Development

AI-Driven Development mere liye ek naya safar hai jahan coding sirf syntax likhne ka kaam nahi raha. Ab developer aik guide, aik architect ban gaya hai jo AI ko direction deta hai. AI hamare saath mil kar reasoning, problem-solving aur speed ko **10x** tak improve kar deta hai.

Future me **Human–AI Collaboration** software development ka sab se strong combination hoga. Insaan Creativity, Context aur Ethics laaye ga, jabke AI Speed, Accuracy aur Automation handle karega. Yani developer replace nahi hoga — balkay AI ke saath mil kar aur powerful ban jayega.

MCQ Answers:

- 1) b)** Empower developers through AI tools
- 2) b)** Creates context-aware prompts
- 3) b)** AI-Driven Development
- 4) b)** Evaluating and improving AI outputs
- 5) b)** Building reasoning + evaluation skills
